EVOLUTION MINI

Constant, perfect espresso taste!

The Mini is the smallest espresso machine in the world in which the temperature of the group head boiler is thermally independent from the steam boiler. It brings about a revolution in the area of traditional espresso machines for household use. The Mini uses the same group head as the Evolution Series resulting in perfect espresso extraction and taste.

The Mini advantages:

- absolute temperature stability through Direct Temperature Control System (DTCS)
- user adjustable temperature of brewing head
- low service and maintenance costs
- up to 30% energy savings with respect to “comparative” machines (in “stand by” operation)
- automatic boiler filling
- self contained water supply and drain tray
- steam boiler (1.5l)
- cold water tank (3l)
- group boiler (0.5l)
- alarm signal (alerts user when tank filling is required)

Technical specifications:

Dimensions (mm): 1.255 x d.390x h.350
Dimensions (inches): h.13 ^{3/4} x w.10" x d.15 ^{3/8}"
Thermal output: max. 2 kW
Connected load: 110 - 240 Volt, 50/60 Hz
Weight: 22 kg, 48.5 Lbs
