

Instructions for Mini Clock DVR

Welcome

Thank you for purchasing the new top of the line Mini Clock DVR. The following product manual will help you to install and operate your new device. Please be sure to fully read the directions before proceeding to use your new Mini Clock DVR.

Please be sure to check that all the accessories are present with your DV640 and be sure to fully charge the device before using it.

Operation

1.) To turn on the device, press down the power key and hold for about two seconds until the indicator light blinks green three times. After about eight seconds the light should blink three more times then automatically begin recording.

2.) To stop recording and turn off the device, press down and hold the power button for about three seconds. The indicator light will blink red three times and the device will turn itself off.

3.) If you wish to delete the video you just took, simply press down the reset key, this will delete the footage.

Charging/File Transfer

1.) Simply connect the Mini Clock DVR to your computer via the USB port on the bottom of the device, this will allow you to watch your files or drag them off of the device onto your PC. If you are using XP or later the PC should automatically detect the device. If you are using Windows 98 however, you will need to install drivers for the device using the included CD.

2.) To charge your device, simply connect it to the PC as you would if you were accessing the files on the device, this will automatically cause it to begin charging. The indicator light should turn red when the battery has completed charging.
